

**IN THE CLAIMS**

Please amend the following claims:

Cancel claims 1-13 and insert new claims 14-25 as follows:

Claims 1-13 (Canceled)

14. (New) A multiport infusion device to be used as an intravenous administrator of prescribed fluid, comprising:

a band adapted to be secured to a user's body part near an intravenous therapy location; and

a multiport body secured to the band and characterized by the provision of a fluid exchange route communicating between a first port and the or each other port of the body.

15. (New) A multiport infusion device to be used an an intravenous administrator of prescribed fluid, comprising:

a band adapted to be secured to a user's body part near an intravenous therapy location; and

a multiport body secured to the band and characterized by the multiport body being a T-piece form.

16. (New) The multiport infusion device according to Claim 1, wherein the multiport body is in the form of a block.

17. (New) The multiport infusion device of Claim 1, wherein the multiport body is of substantially constant cross-section.
18. (New) The multiport infusion device of Claim 1, wherein the band passes through the multiport body.
19. (New) The multiport infusion device of Claim 1, wherein the multiport body is raised from the band allowing air circulation between a tube extending from one of the ports and the intravenous therapy location.
20. (New) The multiport infusion device of Claim 1, wherein the surface of the multiport body that, in use, will be secured, by the band, against the user's skin, is substantially flat.
21. (New) The multiport infusion device of Claim 20, wherein at least one other major external surface of the body is also substantially flat.
22. (New) The multiport infusion device of Claim 20, wherein each other major external surface of the body is also substantially flat

23. (New) The multiport infusion device of Claim 1, wherein one or more of the ports is provided with a sealing cap.
24. (New) The multiport infusion device of Claim 23, wherein the cap or caps is incorporated into the or each port.
25. (New) The multiport infusion device of Claim 1, characterized by the absence of any check valve in any one of the fluid flow passages within the body.
